#### Preamble

#### 1. Introduction

Shri Pancham Khemraj Mahavidyalaya (S.P.K.M.), Sawantwadi (Autonomous) believes in implementing several measures to bringequity, efficiency and excellence in higher education systemin conformity to the guidelines laid down by the University Grants Commission (UGC). In order to achieve these goals, all efforts are made to ensure high standards of education by implementing several steps to enhance the teaching- learning process, examination and evaluation techniques and ensuring the all-round development oflearners.

The four-year course in B.Sc. Chemistry has been designed to have a progressive and innovative curriculum in order to equip our learners to face the future challenges in the field of highereducation. In semesters I and II learners are introduced to the basic areas of Chemistry such as Thermodynamics, Periodic table, Chemical Kinetics, Reaction and Mechanism.

In semesters III and IV the course content is made more rigorous by introducing the details ofeach of the above area. In semesters V and VI, course are designed to help in specialization in the core areas of Chemistry such as Molecular spectroscopy, Nuclear Chemistry, Chemicalthermodynamics, Chemical kinetics, Molecular Symmetry and Chemical Bonding, Solid state Chemistry, Electrochemistry polymers, Quantum chemistry with Renewable energy resources Chemistry of inner transition elements, Theories of the metal-ligand bond, Organometallic chemistry, Mechanism of organic reactions , Stereochemistry, Synthesis of organic compounds, Quality in Analytical Chemistry, Chemical Calculations, Optical Methods, Electro analytical techniques and Applied components dyes and drugs. The practical course has been designed to helpthe student havea firm grip on the theoretical concepts through relevant experiments in each course.

#### 2. Objectives:

- To help learners in developing a scientific attitude through the Chemistry curriculum that involves basic and core areas of Chemistry along with the recent scientific and technologicaladvancements in applied areas of Chemistry
- > To enhance knowledge of Chemistry through problem solving, tutorials and seminars
- To develop practical skills in Chemistry using a range of an activities such as projectsinexperimental Chemistry, study tours, industrial and research institutes visit.
- To inculcate a research attitude by involving learners in simple research projects review ofresearch articles/papers, participation in scientific events etc.
- To help learners in developing analytical abilities and skills so as to address real worldproblems
- To help learners to plan a progressive and successful career in Chemistry, education and industry

#### REGULATIONS

#### 1. Preamble and objectives of the Course:

In the first two semesters of the six semester graduation program of B. Sc.(Chemistry) the learner was introduced to some basic aspects in the various core branches of chemistry like Physical Chemistry, Organic chemistry and Inorganic chemistry. Concepts about the structure of atom, distribution of electrons, Thermodynamics, Formation of organic compounds and basic ideas in reactivity of molecules in general and organic compounds in particular were introduced to the learner. He was made inquisitive about why and how should atoms combine to give molecules or ions. The non-orbital approach to appreciating the shapes of polyatomic species in general and molecules in particular. The story of chemistry is taken further in the coming two semesters of the second year of the B. Sc. (Chemistry) Program. However it is also realised that some students opting for the course on Chemistry may not continue with the subject subsequently as such the syllabus is designed to retain the interest of the serious learner of chemistry as well as be helpful to non-chemistry learners. With such students who would want to pursue other branches of science but would want to acquire a basic appreciation and experience of chemistry a separate paper (Paper-III) is designed. This paper along with the laboratory session unit that goes with it deals with the basics of chemical analysis, separating components from a given sample, basic concepts like pH, experimental techniques like Titrimetry, Gravimetry, using instruments to carry out analysis, the various techniques like chromatography, electrophoresis, Instrumentation in general is felt to be of interest to learners of various branches like physics, botany, zoology, and microbiology.

The major objectives of B.Sc. Chemistry course are

- To infuse in the learner a spirit of inquiry into the fundamental aspects of the various core areas of Chemistry.
- To make the learner proficient in analysing the various observations and chemical phenomena presented to him during the course.
- To make the learner capable of solving problems in the various units of this course
- To give the learner an opportunity to get hands on experience of the various concepts and processes in the various branches of chemistry.
- To impart various skills of handling chemicals, reagents, apparatus, instruments and the care and safety aspects involved in such handling.
- To make the learner capable of analyzing and interpreting results of the experiments he conducts or performs.
- To make the learner capable of acquiring or pursuing a source of livelihood like jobs in chemical industry.
- To arouse the interest to pursue higher levels of learning in chemistry,

#### 2. Condition for Admission

A candidate who has passed the F. Y. B. Sc. of Mumbai University or an examination of some other university accepted by the syndicate as equivalent there to with Chemistry, Physics, Maths, Botany, Zoology or Life Science shall be eligible for admission into S. Y. B. Sc., course in Chemistry.

- **3.** Duration of the Course: one year
- 4. Course of study:

#### Draft copy of the proposed revised syllabus for Choice Based Credit System S. Y. B. Sc. - Chemistry To be implemented from the Academic year 2024-2025

For the subject of chemistry there shall be three papers for 30 lectures each comprising of three units of 10 L each.

#### Semester-III

- 1. Paper-I Physical Chemistry & Analytical Chemistry
- 2. Paper-II Organic Chemistry & Inorganic Chemistry

#### Semester-IV

- 1. Paper-I Physical Chemistry & Analytical Chemistry
- 2. Paper-II Organic Chemistry & Inorganic Chemistry

#### <u>Choice Based Credit System</u> <u>S. Y. B. Sc. Chemistry Syllabus</u> <u>To be implemented from the Academic year 2024-2025</u> <u>Course Content</u>

#### Semester - III

Code	Unit	Topics	Credits	L/Week
	Ι	Chemical Thermodynamics-II, Electrochemistry		
UGSC3CHT201	GSC3CHT201 Chemical Kinetics-II, Solutions,		2	2
	II	Spectrometry And Gravimetric Analysis		
UGSC3CHT202	Ι	Carbonyl Compounds		2
	II	Chemical Bonding & MoT Chemistry of Boron Compounds	2	2
UGSC3CHP203		Chemistry Practicals	2	8

#### Semester – IV

Course Code	Unit	Topics	Credits	L/Week
	Ι	Phase Equilibria, Solid state, Catalysis		
UGSC3CHT206	Π	Separation Techniques in Analytical Chemistry Statistical Treatment of Analytical Data—II	2	2
UGSC3CHT207	Ι	Carboxylic Acids and their Derivatives Heterocyclic compounds	2	2
	Π	Comparative Chemistry of the transition metals & Coordination Chemistry	2	
UGSC3CHP208		Chemistry Practicals	2	8

#### Semester - III Paper I: Physical Chemistry [UGSC3CHT201]

Credit: 02

**Theory: 30 Lectures** 

#### **Unit-I : Chemical Thermodynamics-II**

- **1.1.1** Free Energy Functions: Helmholtz Free Energy, Gibb's Free Energy, Variation of Gibb's free energy with Pressure and Temperature.
- **1.1.2** Gibbs-Helmholtz equation, van't Hoff reaction isotherm and van't Hoff reaction isochore.

(Numericals expected).

#### **Electrochemistry:**

- **1.2.1** Electrolytes: Definition, Strong and Weak electrolytes and their conductance measurement, ions and electrical conductivity by ions.
- 1.2.2 Kohlrausch law of independent migration of ions.
- **1.2.3** Applications of conductance measurements: determination of degree of ionization and ionization constant of weak electrolyte,
- **1.2.4** Transference number and its experimental determination using Moving boundary method. (Numericals expected).Factors affecting transference number.
- **1.2.5** Electrochemical cells, Nernst equation and its importance in generating electricity through chemical reactions. Types of electrochemical cells Reversible and irreversible cells (Definition, example, characteristics)
- **1.2.6** Equilibrium constant and pH measurement using Hydrogen electrode and quinhydrone electrode, from EMF data.

#### 1.3 Chemical Kinetics-II

- **1.3.1** Introduction to reaction mechanism (concept of elementary steps, intermediates, and the overall reaction mechanism with an example of Thermal chain reactions: H<sub>2</sub>. and Br<sub>2</sub>. reaction.
  - **1.3.2** Types of Complex Chemical reactions: Reversible or opposing, consecutive and parallel reactions

(No derivations, only examples expected),

#### **1.4Solutions:**

- **1.4.1** Thermodynamics of ideal solutions: Ideal solutions and Raoult's law, deviations from Raoult's law–non-ideal solutions. Vapour pressure-composition and temperature -composition curves of ideal and non-ideal solutions.
- 1.4.2 Partial miscibility of liquids: Definition, Effect of Temperature, effect of impurity and intermolecular interactions on partial miscibility, Critical solution temperature; Phenol-Water, Triethanolamine Water

Unit II :

#### 2.1 Spectrometry [8 L]

- 2.1.1 Interaction of electromagnetic radiation with matter: Absorption and Emission spectroscopy
- **2.1.2** Basic Terms: Radiant Power, Absorbance, Transmittance, Monochromatic light, Polychromatic light, Wavelength of maximum absorbance, Absorptivity and Molar Absorptivity
- 2.1.3 Statement and derivation of Beer's Law and Lambert's Law, Combined Mathematical Expression of Beer Lambert's Law,
- 2.1.4 Validity and Deviations from Beer-Lambert's Law (Numerical problems based on Beer- Lambert's Law)
- **2.1.5** Block Diagrams for Single beam and double beam Colorimeter (Principle, Construction and Working (Details of Components expected, i.e. source, Sample holder, Filter, Detectors)
- **2.1.6** Block Diagrams for double beam Spectrophotometer (Principle, Construction and working (Details of Components expected i.e., source, Sample holder, Monochromator, Detectors)

#### 2.2 Gravimetric analysis [07L]

- 2.2.1 Introduction and Principle of Gravimetric analysis
- 2.2.2 Precipitation Gravimetry:
  - i) Steps involved in precipitation gravimetric analysis
  - ii) Factors affecting precipitation
  - iii) Concept of Nucleation (Homogenous and Heterogeneous) and crystal growth
  - iv) Impurities involved in precipitates
  - a)Simultaneous precipitation b) Post precipitation c) Co-precipitation
- 2.2.3 Digestion and its importance
- 2.2.4 Filtration, Washing, Drying and Ignition of Precipitate.

#### Paper II: Organic Chemistry And Inorganic Chemistry [UGSC3CHT202]

Credit: 02

#### Theory: 30 Lectures

#### Unit I: Carbonyl Compounds: [15 L]

- 1.1.1 Structure, reactivity of aldehydes and ketones and methods of preparation; hydration of alkynes, Rosenmund reduction and Gattermann Koch formylation
- 1.1.2 General mechanism of nucleophilic addition, and acid-catalysed nucleophilic addition reactions.
- 1.1.3 Reactions of aldehydes and ketones with NaHSO<sub>3</sub>, HCN, RMgX, alcohol, amine, phenyl hydrazine, 2, 4-Dinitrophenyl hydrazine, LiAlH<sub>4</sub> and NaBH<sub>4</sub>.
- 1.1.4 Mechanisms of following reactions: Benzoin condensation, Knoevenagel condensation, Claisen- Schmidt and Cannizzaro reaction.

#### Unit II: 2.1 Directional Bonding: Orbital Approach.(6L)

- 2.1.1 Covalent Bonding,
- 2.1.2 Interaction between two hydrogen atoms and the Potential energy diagram of the resultant system.
- 2.1.3 Definition, concept of Homonuclear diatomic molecules only for He<sub>2</sub> to Ne<sub>2</sub> molecules.
- 2.1.4 Resonance and the Concept of Formal Charge; Rules for Resonance or Canonical Structures.
- 2.1.5 Bonding in Polyatomic Species: The Role of Hybridization. And types of hybrid orbitals-  $sp^3$ ,  $sp^3d$ ,  $sp^2d^2and sp^2d sp^3d^2$ .

#### 2.2 Molecular Orbital Theory (6L)

- 2.2.1 Comparing Atomic Orbitals and Molecular Orbitals.
- 2.2.2 Linear combination of atomic orbitals to give molecular orbitals LCAO-MO approach for diatomic homonuclear molecules).
- 2.2.3 Molecular orbital Theory and Bond Order and magnetic property: with reference to O<sub>2</sub>, O<sub>2</sub><sup>+</sup>, O<sub>2</sub><sup>-</sup>, O<sub>2</sub><sup>2-</sup> (Problems and numerical problems expected wherever possible)

#### 2.3 Chemistry of Boron Compounds (3L)

- 2.3.1 Electron deficient compounds–BH<sub>3</sub>,BF<sub>3</sub>,BCl<sub>3</sub> with respect to Lewis acidity and applications.
- 2.3.2 Structure and bonding in diborane and tetraborane

#### Semester - IV

#### Paper I: Physical And Analytical Chemistry [UGSC4CHT206]

#### Credit: 02

#### **Theory: 30 Lectures**

#### Unit I:

#### 1.1Phase Equilibria:

- 1.1.1 Introduction to Phase equilibria, Phases, components and degrees of freedom of a system, criteria of phase equilibrium. Gibbs Phase Rule.
- 1.1.2 Derivation of Clausius Clapeyron equation and its importance in phase equilibria.
- 1.1.3 Phase diagrams of one-component systems (water and sulphur).

#### 1.2 Solid State:

- 1.2.1 laws of Crystallography and Types of Crystals
- 1.2.2 Characteristics of simple cubic, face-centered cubic and body-centered cubic systems, interplanar distance in a cubic lattice (only expression for ratio of interplanar distances are expected)
- 1.2.3 Use of X-rays in the study of crystal structure, Bragg's equation (derivation expected), X-rays diffraction method of studying crystal lattice structure, structure of NaCl and KCl.

#### 1.3 Catalysis:

- 1.3.1 Types of catalysis, catalytic activity, specificity and selectivity, inhibitors, catalyst poisoning and deactivation, enzyme catalyst
- 1.3.2 Mechanisms and kinetics of acid-base catalyzed reactions, effect of pH.
- 1.3.3 Nanoparticles as catalyst basic concepts, their importance in chemical reactions, properties. Challenges associated with nanoparticles as catalyst.

#### **Unit II :Separation Techniques in Analytical Chemistry**

- 2.1 An Introduction to Analytical Separations and its importance in analysis.
- 2.2 Estimation of an analyte without affecting separation.
- 2.3 Types of separation methods
- 2.3.1 Based on Solubilities (Precipitation, Filtration Crystallisation)
- 2.3.2 Based on Gravity-Centrifugation
- 2.3.3 Based on volatility-Distillation;
- 2.3.4 Based on Electrical effects-Electrophoresis
- 2.3.5 Based on retention capacity of a Stationary Phase -Chromatography;
- 2.3.6 Based on distribution in two immiscible phases-Solvent Extraction;
- 2.3.7 Based on capacity to exchange with a resin-Ion Exchange;

#### 2.4 Electrophoresis:

Principles, Basic Instrumentation, Working and Application in separation of biomolecules like enzymes and DNA.

#### 2.5 Statistical Treatment of Analytical Data—II

- Concept of Precision and Accuracy ,Absolute and Relative Errors
- Mean, Median, Mode, Absolute deviation, Average deviation, Relative average deviation, standard deviation, variance and coefficient of variation

#### **References:**

- 1. D.A. Skoog, D.M. West, F.J. Holler and CX.R. Crouch Fundamentals of Analytical Chemistry, 8<sup>th</sup> edition.

#### Paper II: Organic And Inorganic Chemistry [UGSC4CHT207]

#### Credit: 02

#### **Theory: 30 Lectures**

#### Unit I:

#### 1.1 Carboxylic Acids and their Derivatives:

- **1.1.1.** Acidity of carboxylic acids, effects of substituents on acid strength of aliphatic and aromatic carboxylic acids.
- **1.1.2.** Preparation of carboxylic acids: oxidation of alcohols and alkyl benzene, carbonation of Grignard and hydrolysis of nitriles.
- **1.1.3.** Reactions: Acidity, salt formation, decarboxylation, Reduction of carboxylic acids with LiAlH<sub>4</sub>, diborane, Hell-Volhard-Zelinsky reaction, Conversion of carboxylic acid to acid chlorides, esters, amides and acid anhydrides and their relative reactivity.

#### **1.2 Heterocyclic Compounds**

- **1.2.1.** Classification, nomenclature of 5- and 6-membered rings containing one heteroatom
- **1.2.2.** Synthesis of Furan, Pyrrole (Paal-Knorr synthesis, Knorr pyrrole synthesis, and Hantzsch synthesis), Thiophene, Pyridine (Hantzsch synthesis)
- **2.2.4.** Reactions of furan, pyrrole and thiophene: halogenation, nitration, sulphonation, Vilsmeier-Haack reaction, Friedel-Crafts reaction. Furan: Diels-Alder reaction, Ring opening. Pyrrole: Acidity and basicity of pyrrole. Comparison of basicity of pyrrole and pyrrolidine.

#### Unit-II:

#### 2.1 Comparative Chemistry of the transition metals [6L]

- 1.1.1 Position in the periodic table
- 1.1.2 Significance of special stability of  $d^0$ ,  $d^5$  and  $d^{10}$  leading to variable oxidation states; and their stabilities in aqueous solutions (with special reference to vanadium, and chromium.)
- 1.1.3 Origin of colour for transition metals and their compounds: such as reflectivity, surface coatings, particle size and nature of d-orbitals, number of electrons in the d-orbitals, geometry, and ability for charge transfer).
- 1.1.4 Magnetic properties of transition metal compounds: Origin of magnetism-spin and orbital motion of electrons; equation for spin only and spin-orbital magnetism in terms of Bohr magnetons (No derivation of relevant equations expected)

#### 1.2 Co-ordination Chemistry: [6L]

#### **1.2.1 Introduction to Chemistry of Coordination Compounds**

- i. Basic terms and nomenclature.
- ii. Types of ligands
- iii.Isomerism: General Types with special reference to stereoisomerism of coordination compounds (C.N=6)
- iv. Evidence for the formation of coordination compounds.

#### **1.2.2** Theories of coordination compounds

Werner's Theory of coordination compounds

#### **1.2.3 Nature of the Metal-Ligand Bond:**

- i. Valence Bond Theory; Hybridisation of the central metal orbitals-sp<sup>3</sup>d<sup>2</sup>/d<sup>2</sup>sp<sup>3</sup>
- ii. Inner and outer orbital complexes

#### **References:**

- 1. Modern Analytical Chemistry, David Harvey (page numbers 53-84)
- 2. Fundamentals of analytical chemistry –Skoog and West

#### Semester III:

#### Practicals of Chemistry: [UGSC3CHP203] Major

#### Credit: 02

Theory: 60 Hr.

#### **Unit I: Physical Chemistry**

- 1. To verify Ostwald's dilution law for weak acid conductometrically.
- 2. To determine dissociation constant of weak acid conductometrically.
- 3. Determination of energy of activation of acid-catalyzed hydrolysis of methyl acetate.
- 4. To investigate the reaction between  $K_2S_2O_8$  and KI with equal initial concentrations of the reactants

#### **Unit II: Inorganic Chemistry**

- Identification of cations in a given mixture and Analytically separating them [From a mixture containing not more than two of the following: Pb(II), Ba(II), Ca(II), Sr (II), Cu(II), Cd(II), Mg(II), Zn(II), Fe(II), Fe(III), Ni(II), Co(II) Al(III), Cr(III)] (Any 4
- 2. Investigation of the reaction between Copper sulphate and Sodium Hydroxide (Standard EDTA solution to be provided to the learner).

#### **Unit III: Organic Chemistry**

**Short organic preparation and their purification:** Use 0.5-1.0g of the organic compound. Purify the product by recrystallization. Report theoretical yield, percentage yield and melting point of the purified product.

#### **Preparation of:**

- 1. Cyclohexanone oxime from cyclohexanone.
- 2. Glucosazone from dextrose or fructose
- 3. Tribromoaniline from aniline.
- 4. β-Naphthylbenzoate
- 5. m-Dinitrobenzene from nitrobenzene
- 6. Phthalic anhydride from phthalic acid by sublimation
- 7. Acetanilide from aniline
- 8. p-Bromoacetanilide from acetanilide
- 9. Iodoform from acetone

(Any eight preparations)

#### Semester IV Practicals of Chemistry:[UGSC4CHP208]

#### Credit: 02

Theory: 60 Hr.

#### **Unit I: Physical Chemistry**

- 1. To determine standard EMF and the standard free energy change of Daniel cell potentiometrically.
- 2. To determine the amount of HCl in the given sample potentiometrically.
- 3. Compare the strengths of HCl and H<sub>2</sub>SO<sub>4</sub> by studying kinetics of acid hydrolysis of methyl acetate.
- 4. Industrial visit report. (Any Three)

#### **Unit II: Inorganic Chemistry**

- 1. Inorganic preparation Nickel dimethyl glyoxime using microscale method.
- 2. Complex cation *Tris* (ethylene diamine) nickel (II) thiosulphate.
- 3. Complex anion Sodium Hexanitrocobaltate (III) The aim of this experiment is to understand the preparation of a soluble cation (sodium)and a large anion hexanitrocobaltate (III) and its use to precipitate a large cation (potassium)
- 4. Inorganic salt Calcium or magnesium oxalate using PFHS technique

#### **Unit III: Organic Chemistry**

#### Qualitative Analysis of bi-functional organic compounds on the basis of

- 1. Prelimenary examination
- 2. Solubility profile
- 3. Detection of elements C, H, (O), N, S, X.
- 4. Detection of functional groups
- 5. Determination of physical constants (M.P/B.P)

Solid or liquid Compounds containing not more than two functional groups from among the following classes may be given for analysisto be given: Carboxylic acids, phenol, carbohydrates, aldehydes, ketones, ester, amides, nitro, anilides, amines, alkyl and aryl halides. Students are expected to write balanced chemical reactions wherever necessary. (Minimum 8 compounds to be analyzed)

#### **EXAMINATION PATTERN FOR MAJOR SUBJECTS**

#### A) Continuous Internal Assessment (40 Marks):

Sr. No.	Particulars	Marks
1	One Assignment.	10
2	One offline class test.	20
3	Active participation in routine class/practical's.	05
4	Overall conduct as a responsible learner, mannerism and articulation and exhibit of leadership qualities in organizing related academic activities	05

#### B) Semester End Examination (60 Marks):

Question Paper Pattern

- 1. These examinations shall be of **Two Hours** duration. Maximum marks **60**.
- There shall be four questions each of 15 marks. Question 1 will be based on entire syllabus with Six MCQs, Six questions on match the column and Six questions based on true/false. Questions 2 and 3 will be based on Unit-I and Unit-II respectively.Questions 4 will be based on Unit-I and II.
- 3. All questions shall be compulsory with internal choice within the questions. (Each question will be of **18 to 20 marks** with options.)
- 4. Question may be subdivided into sub-questions A, B, C, D & E the allocation of marks depends on the weight age of the topic.

#### **Distribution of external 60 marls**

Qn.	Sub-Qn	Particulars	Unit	Marks with options	Total Marks for qn
1	Α	Choose the Correct answer and rewrite the statement. (Attempt any five out of seven)	I, II	07	15
	В	Match the Columns. (Attempt any five out of seven)		07	
	С	State whether the statement is true or false. (Attempt any five out of six)		06	
2	A,B,C,D , E	Answer the following (Attempt <b>any three out of five</b> )	Ι	20	15
3	A,B,C, D,E	Answer the following (Attempt <b>any three out of five</b> )	П	20	15
4	A,B,C,D ,E	Answer the following (Attempt <b>any three out of five</b> )	I& II	20	15
		Total		80	60

#### C) Semester End Practical Examination (50 marks): Scheme of examination:

- There will be no internal assessment for practical.
- A candidate will be allowed to appear for the semester end practical examination only if the candidate submits a certified journal at the time of practical examination of the semester or a certificate from the Head of the Department/Institute to the effect that the candidate has completed practical course of that semester of S.Y.B.Sc. Chemistry as per the minimum requirement
- The practical examination will be conducted in **ONE SESSIONS** of three hours each.
- The learners will be evaluated based on the experiments performed during the examination.
- The questions on slips for the same should be framed in such a way that candidate will be able tocomplete the task and should be evaluated for the skill and understanding of Chemistry.

#### **PREAMBLE:**

S. P. K. Mahavidyalaya, Sawantwadi (Autonomous) believes in implementing several measures to bringequity, efficiency and excellence in higher education system in conformity to the guidelines laid down by the University Grants Commission (UGC). In order to achieve these goals, all efforts are made to ensure high standards of education by implementing several steps to enhance the teaching- learning process, examination and evaluation techniques and ensuring the all-round development oflearners.

The four-year course in B.Sc. Chemistry has been designed to have a progressive and innovative curriculum in order to equip our learners to face the future challenges in the field of higher education. In semesters I and II learners are introduced to the basic areas of Chemistry such as Thermodynamics, Periodic table, Chemical Kinetics, Reaction and Mechanism.

In semesters III and IV the course content is made more rigorous by introducing the details of each of the above area. In semesters V and VI, course are designed to help in specialization in the core areas of Chemistry such as Molecular spectroscopy, Nuclear Chemistry, Chemical thermodynamics, Chemical kinetics, Molecular Symmetry and Chemical Bonding, Solid state Chemistry, Electrochemistry polymers, Quantum chemistry with Renewable energy resources Chemistry of inner transition elements, Theories of the metal-ligand bond, Organometallic chemistry, Mechanism of organic reactions , Stereochemistry, Synthesis of organic compounds, Quality in Analytical Chemistry, Chemical Calculations, Optical Methods, Electro analytical techniques and Applied components dyes and drugs. The practical course has been designed to helpthe student have a firm grip on the theoretical concepts through relevant experiments in each course. **OBJECTIVES:** 

- To help learners in developing a scientific attitude through the Chemistry curriculum that involves basic and core areas of Chemistry along with the recent scientific and technological advancements in applied areas of Chemistry
- To enhance knowledge of Chemistry through problem solving, tutorials and seminars
- To develop practical skills in Chemistry using a range of a activities such as projects in experimental Chemistry, study tours, industrial and research institutes visit.
- To inculcate a research attitude by involving learners in simple research projects reviewof research articles/papers, participation in scientific events etc.
- To help learners in developing analytical abilities and skills so as to address real world problems
- To help learners to plan a progressive and successful career in Chemistry, education and industry

**<u>Program Outcome</u>**: After successful completion of this programme learners will be able to

- Develop the knowledge of basic concepts of different branches of science required for postgraduate studies.
- Inculcate the skills useful in science laboratories for pursuing jobs in Industries.
- Introduce learners to the concepts useful for environment protection.
- Follow interdisciplinary approach for developing scientific temperament.
- Identify, formulate and analyze scientific problems and reach concrete solutions forsocietal benefits.

**Program Specific Outcome:** After successful completion of this programme (Chemistry)learners are able to

- Develop the knowledge of basic concepts in chemistry.
- Inculcate the skills useful in chemistry laboratory.
- Introduce learners to the green chemistry needs and concepts.
- Identify, formulate and analyze scientific problems and reach concrete solutions forsocietal benefits using various principles of chemical sciences.
- Acquire & explore essential skills to succeed in various chemical industries.
- Get a hold on higher educational opportunities like post-graduation in chemistry.
- Pursue higher studies in interdisciplinary areas such as biochemistry, genetics, pathology etc.
- Explore research areas in chemistry and related fields.

#### DEPARTMENT OF CHEMISTRY Syllabus

#### Proposed Syllabus for CBCS S. Y. B. Sc.: Fundamental Chemistry (Minor)

#### **Structure of the Course:**

The structure of minor courses (with codes) for Semester -III and IV for S. Y. B. Sc.

(Chemistry)NEP-2020 is given below

Semester	Course Code	Course title	No. of Credits	No of Lectures In Hours
	UGSC3CHT204 (Minor)	Fundamental Chemistry (Minor)	2	30
III	UGSC3CHP205 (Minor)	Practicals of Chemistry	2	60
	UGSC4CHT209 (Minor)	Fundamental Chemistry (Minor)	2	30
IV	UGSC4CHP210 (Minor)	Practicals of Chemistry	2	60

#### Fundamental Chemistry (Minor)

#### SEMESTER-III

Course Code	Unit	Topics	Credits	L/Week
UGSC3C HT204 (Minor) (Fundamental Chemistry)	I	Chemical Thermodynamics-II, Chemical Kinetics- II Classical Methods of Analysis Alcohols, phenols and epoxides, Non- Directional Bonding, Chemistry of Silicon	2	2
UGSC3C HP205		Practicals of Chemistry	2	4

#### **SEMESTER-IV**

Course Code	Unit	Topics	Credits	L/Week
UGSC3C HT209 (Minor) (Fundamental Chemistry)	I	Chemical Thermodynamics-II, Chemical Kinetics- II Classical Methods of Analysis Alcohols, phenols and epoxides, Non- Directional Bonding, Chemistry of Silicon	2	2
UGSC3C HP210		Practicals of Chemistry	2	4

#### Semester- III

#### Paper I: Physical & Analytical Chemistry [UGSC3CHT204]: <u>Minor</u> Credit: 02 Theory: 30 Lectures

#### Unit I:

#### 1.1 Chemical Thermodynamics-II

- **1.1.1** Free Energy Functions: Helmholtz Free Energy, Gibb's Free Energy, Variation of Gibb's free energy with Pressure and Temperature.
- **1.1.2** Gibbs-Helmholtz equation, van't Hoff reaction isotherm. (Numericals expected).
- **1.1.3** Thermodynamics of Open System: Partial Molal Properties, Chemical Potential and its

variation with Pressure and Temperature, Gibb's Duhem equation.

#### 1.2 Chemical Kinetics-II

- **1.2.1** Introduction to reaction mechanism (concept of elementary steps, intermediates, and the overall reaction mechanism with an example of Thermal chain reactions: H<sub>2</sub>. and Br<sub>2</sub>. reaction.
- **1.2.2** Types of Complex Chemical reactions: Reversible or opposing, consecutive and parallel reactions

(No derivations, only examples expected),

#### **1.3. Titrimetric Methods**

- **1.3.1** Terms involved in Titrimetric methods of analysis. Comparing volumetry and Titrimetry.
- **1.3.2** The Conditions suitable for titrimetry
- **1.3.3** Types of titrimetry
  - i) Neutralisation (Acidimetry, alkalimetry)
  - ii) Redox (Iodometry, Iodimetry,)
  - iii) Precipitation
  - iv) Complexometric titrations

#### Unit: II

#### 2.1 Alcohols, phenols and epoxides:

- **2.1.1** Alcohols: Nomenclature, Preparation: Hydration of alkenes, hydrolysis of alkyl halides, reduction of aldehydes and ketones, using Grignard reagent. Properties: Hydrogen bonding, types and effect of hydrogen bonding on different properties. Acidity of alcohols, Reactions of alcohols
- **2.1.2 Phenols:** Preparation, physical properties and acidic character. Comparative acidic strengths of alcohols and phenols, resonance stabilization of phenoxide ion. Reactions of phenols.
- **2.1.3 Epoxides:** Nomenclature, methods of preparation and reactions of epoxides: reactivity, ringopening reactions by nucleophiles (a) In acidic conditions: hydrolysis, reaction with halogen halide, alcohol, hydrogen cyanide. (b) In neutral or basic conditions: ammonia, amines, Grignard reagents, alkoxides

#### 2.2 Non-Directional Bonding

- 2.2.1 Ionic Bond: Conditions for the Formation of Ionic Bond. Types of Ionic Crystals'
- 2.2.2 Radius Ratio Rules

#### 2.3 Chemistry of Silicon

- 2.3.1 Silicon compounds: Occurrence, Structure and Inertness of SiO<sub>2</sub>
- 2.3.2 Preparation of structure of SiCl<sub>4</sub>
- 2.3.3 Preparation of extra-pure Silicon

#### Semester IV

#### Paper I: Physical & Analytical Chemistry [S211 CHT]: <u>Minor</u> Credit: 02 Theory: 30 Lectures

#### Unit I:

#### **1.1.Catalysis:**

- 1.1.1. Types of catalysis, catalytic activity, specificity and selectivity, inhibitors, catalyst poisoning and deactivation, enzyme catalyst
- 1.1.2. Mechanisms and kinetics of acid-base catalyzed reactions, effect of pH.
- 1.1.3. Nanoparticles as catalyst basic concepts, their importance in chemical reactions, properties. Challenges associated with nanoparticles as catalyst.

#### **1.3 Potentiometry:**

- **1.3.1** Principle.
- **1.3.2** Role of Reference and indicator electrodes
- 1.3.3 Applications in Neutralization reactions with reference to the titration of Strong acid against Strong Base (using quinhydrone electrode)

#### **1.4 Conductometry**

- 1.4.1 Principle
- 1.4.2 Conductivity cell: Construction
- 1.4.3 Applications in Neutralization Titrimetry with respect to
  - i. Strong Acid-Strong Base
  - ii. Weak Acid- Weak Base.

#### Unit II:

#### 2.1 Sulphonic acids: [5L]

Nomenclature, preparation of aromatic sulphonic acids by sulphonation of benzene (with mechanism), toluene and naphthalene, Reactions: Acidity of arene sulfonic acid, Comparative acidity of carboxylic acid and sulfonic acids. Salt formation, desulphonation. Reaction with alcohol, phosphorous pentachloride, IPSO substitution

#### 2.2 Diazonium Salts :(6L)

Preparation and their reactions/synthetic application - Sandmeyer reaction, Gattermann reaction, Gomberg reaction, Replacement of diazo group by -H,-OH. Azo coupling with phenols, naphthols and aromatic amines, reduction of diazonium salt to aryl hydrazine and hydroazobenzene

#### 2.3 Coordination Compounds

#### 2.3.1 Introduction to Chemistry of

2.3.1.1 Historical perspectives : Early ideas on coordination compounds ii. Basic terms and nomenclature.

iii. Types of ligands

#### 2.3.2 Application of coordination compounds.

#### **Semester III:**

#### Practicals of Chemistry: [UGSC3CHP203] Major

#### Credit: 02

Theory: 60 Hr.

#### **Unit I: Physical Chemistry**

- 5. To verify Ostwald's dilution law for weak acid conductometrically.
- 6. To determine dissociation constant of weak acid conductometrically.
- 7. Determination of energy of activation of acid-catalyzed hydrolysis of methyl acetate.
- 8. To investigate the reaction between  $K_2S_2O_8$  and KI with equal initial concentrations of the reactants

#### **Unit II: Inorganic Chemistry**

- Identification of cations in a given mixture and Analytically separating them [From a mixture containing not more than two of the following: Pb(II), Ba(II), Ca(II), Sr (II), Cu(II), Cd(II), Mg(II), Zn(II), Fe(II), Fe(III), Ni(II), Co(II) Al(III), Cr(III)] (Any 4
- 2. Investigation of the reaction between Copper sulphate and Sodium Hydroxide (Standard EDTA solution to be provided to the learner).

#### **Unit III: Organic Chemistry**

**Short organic preparation and their purification:** Use 0.5-1.0g of the organic compound. Purify the product by recrystallization. Report theoretical yield, percentage yield and melting point of the purified product.

#### **Preparation of:**

- 1. Cyclohexanone oxime from cyclohexanone.
- 2. Glucosazone from dextrose or fructose
- 3. Tribromoaniline from aniline.
- 4. β-Naphthylbenzoate
- 5. m-Dinitrobenzene from nitrobenzene
- 6. Phthalic anhydride from phthalic acid by sublimation
- 7. Acetanilide from aniline
- 8. p-Bromoacetanilide from acetanilide
- 9. Iodoform from acetone (Any eight preparations)

#### Semester IV Practicals of Chemistry:[UGSC4CHP208]

#### Credit: 02

Theory: 60 Hr.

#### **Unit I: Physical Chemistry**

- 5. To determine standard EMF and the standard free energy change of Daniel cell potentiometrically.
- 6. To determine the amount of HCl in the given sample potentiometrically.
- 7. Compare the strengths of HCl and H<sub>2</sub>SO<sub>4</sub> by studying kinetics of acid hydrolysis of methyl acetate.
- 8. Industrial visit report. (Any Three)

#### **Unit II: Inorganic Chemistry**

- 5. Inorganic preparation Nickel dimethyl glyoxime using microscale method.
- 6. Complex cation *Tris* (ethylene diamine) nickel (II) thiosulphate.
- 7. Complex anion Sodium Hexanitrocobaltate (III) The aim of this experiment is to understand the preparation of a soluble cation (sodium)and a large anion hexanitrocobaltate (III) and its use to precipitate a large cation (potassium)
- 8. Inorganic salt Calcium or magnesium oxalate using PFHS technique

#### **Unit III: Organic Chemistry**

#### Qualitative Analysis of bi-functional organic compounds on the basis of

- 6. Prelimenary examination
- 7. Solubility profile
- 8. Detection of elements C, H, (O), N, S, X.
- 9. Detection of functional groups
- **10. Determination of physical constants (M.P/B.P)**

Solid or liquid Compounds containing not more than two functional groups from among the following classes may be given for analysisto be given: Carboxylic acids, phenol, carbohydrates, aldehydes, ketones, ester, amides, nitro, anilides, amines, alkyl and aryl halides. Students are expected to write balanced chemical reactions wherever necessary. (Minimum 8 compounds to be analyzed)

#### **EXAMINATION PATTERN FOR MINOR SUBJECTS**

#### A) Continuous Internal Assessment (40 Marks):

Sr. No.	Particulars	Marks
1	One Assignment.	10
2	One offline class test.	20
3	Active participation in routine class/practical's.	05
4	Overall conduct as a responsible learner, mannerism and articulation and exhibit of leadership qualities in organizing related academic activities	05

#### **B)** Semester End Examination (60 Marks):

**Question Paper Pattern** 

- 1. These examinations shall be of **Two Hours** duration. Maximum marks **60**.
- 2. There shall be four questions each of **15 marks**. **Question 1** will be based on entire syllabuswith **Six MCQs**, **Six questions** on match the column and **Six questions** basedon true/false. **Questions 2** and **3** will be based on **Unit-I and Unit-II respectively.Questions 4** will be based on **Unit-I and II**.
- 3. All questions shall be compulsory with internal choice within the questions. (Each questionwill be of **18 to 20 marks** with options.)
- 4. Question may be subdivided into sub-questions A, B, C, D & E the allocation of marks depends on the weight age of the topic.

#### **VOCATIONAL SKILL COURSE**

#### Experimental Chemistry – III [UGSC4CHVS03]

#### (Credit 02)

#### **Semester-III: Chemistry Practicals**

#### 1. Tools of Analytical Chemistry-I:

- a) Analytical glass wares like burettes, pipettes, Standard flasks, Separating funnels.
- b) Weighing tools -digital balances:
- c) Incineration devices: Burners, Muffle Furnace,
- d) Drying Devices: Hot Air Oven, microwave oven, Desiccators, Vacuum desiccators
- e) Monochromators, Filters, Sample holders, Prisms, Diffraction Gratings, Photo-emissive cells, Photomultiplier tubes
- f) Filtration Flasks, Funnels, Separating Funnels, Distillation apparatus, Vacuum Distillation assembly, Centrifuge machine,
- g) Development chamber for chromatography
- h) Electrodes like Reference Electrodes and Indicator Electrodes (with respect to care and maintenance.)
- i) Conductivity cell (with respect to care and maintenance.)
- j) Combined Glass electrode (with respect to care and maintenance.)
- k) Types of Salt Bridges and preparation of anyone or use of a salt bridge, its effect on the potential of a given electrode/cell

(The learner should draw diagrams and write-ups providing uses, care and maintenance of the items mentioned in (a)and principle, construction and uses of items(b)to (e)in his journal.)

- 2. Gravimetric estimation of Nickel (II) as Ni-DMG and calculation of % error. (The learner is expected to know the role of the various reagents/chemicals used in the estimation, the various steps involved. They should write the complete and Balanced chemical reaction for the formation of the Ni(DMG)<sub>2</sub> complex.
- **3. Estimation of Fe Volumetrically**
- 4. To determine solubility of sparingly soluble salts (any two) conductometrically.
- 5. Estimation of Amide Volumetrically
- 6. Estimation of Acetone Iodometrically
- 7. Estimation of Fe (II) in the given solution by titrating against  $K_2Cr_2O_7$  potentiometrically and calculation of % error.

(The learner is expected to learn the handling of the potentiometer, use of Platinum electrode and reference electrode like SCE. They will learn to determine endpoint by plotting a graph. They are also expected to state the error estimate of their results).

#### 8. Gravimetric estimation of Zinc as ZnSO4 and calculation of % error.

(The learner is expected to write a balanced chemical reaction, need for digestion of the precipitate and the skill required to carry out the incineration and to estimate the% error.)

#### **Program Outcomes:**

Students will demonstrate an understand major concepts of Environment in association with multidisciplinary subjects such as physics, chemistry and mathematics etc. Understood the basic concepts, fundamental principles, and the scientific theories related to various scientific phenomena and their relevance in the day-to-day life. Effective Communication- Development of various communication skills such as reading, listening, speaking, etc., which we will help in expressing ideas and views clearly and effectively. Social Interaction- Development of scientific outlook not only with respect to science subjects but also in all aspects related to life. Effective Citizenship- Imbibe moral and social values in personal and social life leading to highly cultured and civilized personality. Ethics- Follow the ethical principles and responsibilities to serve the society. Environment and Sustainability- Understand the issues of environmental contexts and sustainable development. Self-directed and Lifelong learning- Students will be capable of self- paced and self-directed learning aimed at personal development and for improving knowledge/skill development.

#### **COURSE OBJECTIVES:**

- > To study about environment and ecosystems
- > To study about different types of natural resource.
- > Knowledge and concept of biodiversity and its conservation.
- Basic knowledge and concept of causes, effect and control of different type of environmental pollution.
- > To study population growth and its impact on environment

**COURSE OUTCOMES (CO):** After completion of the course, a student will be able to COURSE OUTCOME :

- CO1 Gain knowledge about environment and ecosystem.
- CO2 Students will learn about natural resource, its importance and environmental impacts of human activities on natural resource.
- CO3-Gain knowledge about the conservation of biodiversity and its importance.
- CO4 Aware students about problems of environmental pollution, its impact on human and ecosystem and control measures.
- CO5- Students will learn about increase in population growth and its impact on environment

#### **Scheme of Examination**

#### A) Internal Assessment of 20 Marks:

Sr. No.	Particulars	Marks
1	One Assignment/test	10
2	Class attendance	05
3	One subject based activity/viva based on the course	05
	Total Marks	20

#### **External Assessment of 30 Marks:**

Sr. No.	Particulars	Marks
1	External Exam	30
	Total Marks	30

S. Z. S. P. Mandal's

### SHRI PANCHAM KHEMRAJ MAHAVIDYALAYA SAWANTWADI (AUTONOMOUS)

DIST: SINDHUDURG- 416 510, MAHARASHTRA

# Syllabus for Approval Programme:- S. Y. B. Sc. Chemistry SKILL ENHANCEMENT COURSE

w.e.f. Academic Year 2025-26

Choice Based Credit System S. Y. B. Sc. Chemistry Syllabus

## **University of Mumbai**

S. Z. S. P. Mandal's SHRI PANCHAM KHEMRAJ MAHAVIDYALAYA SAWANTWADI (An Autonomous College) DIST: SINDHUDURG- 416 510, MAHARASHTRA DEPARTMENT OF CHEMISTRY Syllabus for Approval

Sr. No.	Heading	Particulars
1.	Title of the Course	S. Y. B. Sc.
2.	Eligibility for Admission	F. Y. B. Sc.
3.	Passing Marks	40%
4.	Ordinance/Regulations (if any)	
5.	No. of Years/Semesters	Two Semesters
6	Level	UG
7	Pattern	Semester (60:40)
8	Status	Revised
9	To be implemented from Academic Year	From Academic Year 2024-2025

Date:

Signature HoD, Dept. of Chemistry

#### Shri Pancham Khemraj Mahavidyalaya, Sawantwadi

Proposed First Year Curriculum as per NEP 2020 Department of Chemistry

Syllabus Structure for Skill Enhancement Course

Semester	Paper Code	Paper Title	Туре	Credits
III	UGSC3CHSE03	Experimental Chemistry - III	Т	2

#### SEMESTER-III SKILL ENHANCEMENT COURSE : [UGSC3CHSE03] Experimental Chemistry – III:

#### (Credit 02)

#### **Semester-III: Chemistry Practicals**

- 1) Preparations of Aspirin
- 2) Preparations of Benzimidazole
- 3) Preparations of Glucosazone from glucose or fructose
- 4) Preparations of Tribromoaniline from aniline.
- 5) Estimation of Calcium and Magnesium ions as calcium carbonate by complexometric titration.
- 6) Determination of dissolved oxygen (DO) in a given water sample.

#### **Reference:**

- **1.** D.A. Skoog, D.M. West, F.J. Holler, and S.R. Crouch, Analytical Chemistry: An Introduction,7<sup>th</sup> ed., Chapter 15, pp. 345-381.
- **2.** A.I. Vogel."Text book of Quantitative Inorganic Analysis", Longman, London (1961).
- **3.** R.V. Dilts."Analytical Chemistry. Methods of Separation", van Nostrand, N.Y.(1974).
- **4.** Some Experiments for B. Tech in Chemistry & Chemical Technology compiled by Prof. J.B. BARUAH, Mrs. Abhilasha Mohan Baruah and Mr. Parikshit Gogoi.

#### **Examination Pattern**

#### A) Semester End Practical Examination (50 marks): Scheme of examination:

- There will be no internal assessment for practical.
- A candidate will be allowed to appear for the semester end practical examination only if the candidate submits a certified journal at the time of practical examination of the semester or a certificate from the Head of the Department/Institute to the effect that the candidate has completed the practical course of that semester of S.Y.B.Sc. Chemistry as per the minimumrequirement
- The practical examination will be conducted in **ONE SESSIONS** of three hours each.
- The learners will be evaluated based on the experiments performed during theexamination.
- The questions on slips for the same should be framed in such a way that candidate will be able to complete the task and should be evaluated for theskill and understanding of Chemistry.

# Distribution of Marks in Practical Examination

Sr. No.	Particulars	Marks
1	Experiment	30
	Viva voce	10
2	Certified journal	10
	Total Marks	50

#### Shri Pancham Khemraj Mahavidyalaya, Sawantwadi Proposed First Year Curriculum as per NEP 2020 Department of Chemistry Syllabus Structure for Open Elective

Semester	Paper Code	Paper Title	Туре	Credits
ш	UGSC3CHOE02 (GE/OE)	Water Pollution: A Case Study	Т	2
	UGSC3CHOE03 (GE/OE)	Chemistry in Everyday Life	Т	2
IV	UGSC4CHOE04 (GE/OE)	Eco-Chemistry	Т	2
	UGSC4CHOE05 (GE/OE)	Air Pollution: A Case Study	Т	2

#### **Program Outcomes:**

Students will demonstrate an understand major concepts of Environment in association with multidisciplinary subjects such as physics, chemistry and mathematics etc. Understood the basic concepts, fundamental principles, and the scientific theories related to various scientific phenomena and their relevance in the day-to-day life. Effective Communication- Development of various communication skills such as reading, listening, speaking, etc., which we will help in expressing ideas and views clearly and effectively. Social Interaction- Development of scientific outlook not only with respect to science subjects but also in all aspects related to life. Effective Citizenship- Imbibe moral and social values in personal and social life leading to highly cultured and civilized personality. Ethics- Follow the ethical principles and responsibilities to serve the society. Environment and Sustainability- Understand the issues of environmental contexts and sustainable development. Self-directed and Lifelong learning- Students will be capable of self- paced and self-directed learning aimed at personal development and for improving knowledge/skill development.

#### **COURSE OBJECTIVES:**

- > To study about environment and ecosystems
- > To study about different types of natural resource.
- > Knowledge and concept of biodiversity and its conservation.
- Basic knowledge and concept of causes, effect and control of different type of environmental pollution.
- > To study population growth and its impact on environment

**COURSE OUTCOMES (CO):** After completion of the course, a student will be able to COURSE OUTCOME :

- CO1 Gain knowledge about environment and ecosystem.
- CO2 Students will learn about natural resource, its importance and environmental impacts of human activities on natural resource.
- CO3-Gain knowledge about the conservation of biodiversity and its importance.
- CO4 Aware students about problems of environmental pollution, its impact on human and ecosystem and control measures.
- CO5- Students will learn about increase in population growth and its impact on environment

#### SEMESTER-III OPEN ELECTIVE WATER POLLUTION: A CASE STUDIES: [UGSC3CHOE02]

	[30 L]
WATER POLLUTION	
A CASE STUDY:	
1) Meenamata Diseases	
2) Ganga Pollution	
3) Itai – Itai Disease	
4) Kim Kim River Toxic Pollution

#### SEMESTER-III **OPEN ELECTIVE** Chemistry in Everyday Life: [UGSC3CHOE03]

(Credit 02)	[30 L]
	<b>Dairy Products</b> : Composition of milk and milk products. Analysis of fat content, minerals in milk and butter. Estimation of added water in milk.
	<b>Beverages</b> : Analysis of caffeine in coffee and tea, detection of chicory in coffee, chloral hydrate in toddy, estimation of methyl alcohol in alcoholic beverages.
	<b>Food additives, adulterants and contaminants</b> - Food preservatives like benzoates, propionates, sorbates, disulphites.
UGSC3CHOE03	Artificial sweeteners: Aspartame, saccharin, dulcin, sucralose and sodium cyclamate.
	Flavours: Vanillin, alkyl esters (fruit flavours) and monosodium glutamate.
	Artificial food colorants: Coal tar dyes and non-permitted colours and metallic salts. Analysis of pesticide residues in food.
	<b>Paints &amp; Pigments</b> : White pigments (white lead, ZnO, lithopone, TiO2). Blue, red, yellow and green pigments. Paints and distempers: Requirement of a good paint. Emulsion, latex; luminescent paints. Fire retardant paints and enamels, lacquers. Solvents and thinners for paints.
	<b>Dyes:</b> Colour and constitution (electronic concept). Classification of dyes. Methods of applying dyes to the fabrics. A general study of azo dyes, Mordant brown, Congo red and methyl orange.
